

SARAH MURDOCH

*Bring on the Day*

pill bottle cap, gold acrylic, epoxy, vitamin E and green tea pills, vintage chains and jewelry parts, 14ct gold filled chain and findings

“We supplement our bodies everyday with everything from daily vitamins to cod liver oil pills to vitamin C drinks. There is an increasing trend in providing our bodies with all the right supplements to keep us from wearing down and aging. With this there is also greater than ever time, effort and money spent on the daily maintenance of our bodies.

These earrings represent this contrasting dynamic. They are both blooming and bright but also show the wear down from the everyday use. This can be seen through the shining gold and amber color of the vitamin E and green tea pills, which both heal and energize. And by contrast, the wear-down from the everyday can be seen through the chipping paint and vintage jewelry pieces.”
